

Greetings,

First, I'd like to take a moment to thank you for showing interest in doing business with our company. We appreciate your business and look forward to working with you.

itkServices is a Hispanic and veteran owned security management consultancy dedicated to the idea that security is a strategic need for all businesses, both large and small. We live in an economy where insurance fraud exceeds 80 billion a year, over 59 billion's worth of intellectual property is stolen each year, and an additional 32 billion is taken from your bottom line by way of retail theft.

itkServices is a security management consultancy, not because of the services we provide, but by the way we provide them. Using a services version of the theory of *economies of scale*, we believe that consolidating all aspects of asset protection into one package offers our clients the most efficient approach to lessening the potential for financial losses due to false insurance claims, theft of proprietary information, exploitation of physical and procedural vulnerabilities, and risk to the health and welfare of their people assets. This methodology provides for an economical way for smaller businesses to protect themselves as aggressively as their larger counterparts.

itkServices is comprised of experienced and well trained professionals from our federal law enforcement, security, and intelligence communities. On average, we have over 20 years of individual practical experience and advanced civil education in business, human resource, public administration, instructional design, education, network administration, and computer engineering. Our focus is on merging good business practices with sound security procedures to develop a program that is as unique as our clients.

Please enjoy your visit to our web site and we look forward to hearing from you.

Respectfully yours,

Reinaldo Mortane
President and CEO
itkServices, LLC
